Dear Mr. Kusu:

Infineum has asked us to consider approving, for use in GE diesel engines, a locomotive diesel engine lubricating oil identified as **Aminol M-14D2** code **IME1505942-A**. It is our understanding that this is a SAE 40 grade locomotive diesel engine lubricating oil formulated with **Infineum M7233** additive system in **Turkmenbashi** base stock. The nominal alkalinity level of this lubricating oil is 13 by ASTM D 2896.

After reviewing the information supplied to us by **Infineum**, it is our technical opinion that this oil will provide satisfactory service in GE diesel engines. Therefore, we are granting “Fundamental Approval” to **Aminol M-14D2** Generation 4LL lubricating oil for use in GE diesel engines. This Generation 4 Long Life (LL) crankcase oil is approved to be used with the ASTM D975 S5000 diesel fuels. The use of GE Generation 4 LL engine oil is not recommended for use in GE engines consuming diesel fuel with a sulfur levels ≤ 500 PPM.

If you have any questions, please feel free to contact us.

Sincerely,

Jerainne Heywood, Ph.D.
Senior Lubricants and Fuels Technologist

OIL APPROVALS/INFINEUM/Alfa Number: **2019-3007**
